

MARSHID P

Software Developer | Python & Full-Stack Development | B.Sc. Computer Science

Koppam, Kerala, India | +91 9072782388 | marshimarshu007@gmail.com | linkedin.com/in/marshidp | github.com/marshu123

PROFILE

Computer Science graduate (2026) with strong Python skills and practical experience across requirement analysis, software design, development, testing, debugging, and maintenance. Experienced in unit testing, static checks, local and CI builds, test-environment setup, defect isolation, root-cause analysis, and technical documentation. Strong analytical and problem-solving abilities with a responsible, collaborative approach. Available immediately for software or operations roles.

TECHNICAL SKILLS

Primary Language: Python — advanced (application development, FastAPI services, SQLAlchemy ORM, scripting, automated testing) **Additional Languages:** SQL, JavaScript, TypeScript, Java, C, Dart
Software Engineering: Requirement Analysis, Software Design, Modular Construction, Unit Testing, Static Code Analysis, Local & CI Builds, Test Environment Setup, Defect Location and Root-Cause Analysis, Technical Documentation
Data Science & AI: Machine Learning Fundamentals, Data Analysis, Statistical Reasoning, Relational Data Modelling
Frameworks & Tools: FastAPI, SQLAlchemy, React, Flutter, MySQL, Docker, Git, GitHub Actions (CI/CD), Linux, AWS (EC2, S3, Elastic Beanstalk)

SOFTWARE PROJECTS

Task Manager — Full-Stack Application (Individual Project)

Python, FastAPI, SQLAlchemy, MySQL, React, TypeScript, Docker, GitHub Actions, AWS

- Translated requirements into a modular design with separate API, data-access, and presentation layers.
- Developed backend services using Python, FastAPI, and SQLAlchemy ORM.
- Wrote unit tests and configured GitHub Actions for static checks, builds, and automated testing.
- Created reproducible Docker-based test environments for consistent local and CI execution.
- Identified and resolved API and data-layer defects using root-cause analysis and regression testing.
- Documented setup, API endpoints, and deployment procedures..
- Repository: github.com/marshu123/task-manager

Local Labour Finder — Cross-Platform Mobile Application

Flutter, Dart, MySQL

- Designed application structure and data flow for a location-based matching service.
- Built reusable Flutter components and integrated MySQL search and matching functionality.
- Tested across devices, identified defects, and improved workflows using user feedback.

EDUCATION

B.Sc. in Computer Science — Cherpulassery College of Science and Technology, Kerala, India | 2023 – 2026 | CGPA: 5.708 / 10 (First Class)

Relevant coursework: software engineering and testing, data structures and algorithms, databases and SQL, operating systems, statistics and data analysis, machine learning fundamentals.

CERTIFICATIONS AND TRAINING

Data Science Job Simulation - Forage | August 19, 2026

- Completed practical work modelling lounge eligibility at Heathrow Terminal 3 and predicting customer buying behaviour.

Tech Explorer Job Simulation - Forage | August 20, 2026

- Completed practical work in iOS widget development, requirements gathering, identity and access management, and data-driven online advertising.
- GenAI Powered Data Analytics Job Simulation — Forage | September 8, 2026

Exploratory data analysis and risk profiling; AI-based delinquency prediction; business reporting and data storytelling; AI-driven collections strategy.

- AI for Business Professionals — HP LIFE | September 12, 2026

AI's role in business, standalone vs. integrated AI tools, effective prompt crafting, ethical use, and AI-supported professional growth.

ADDITIONAL INFORMATION

Languages: English (professional working proficiency), Malayalam (native) | **Nationality:** Indian | **Availability:** Immediate — open to relocation, on-site work and international assignment
